

Principal's Message

Dear Students, Parents, Teachers, and Well-Wishers,

It is with immense pleasure and deep gratitude that I address each one of you.

At Modern Public School & College, we are committed to providing an environment that motivates children to become self-reliant and confident individuals. For over 33 years, our institution has been dedicated to delivering high-quality, affordable education to all. We continuously strive to innovate in the field of education, integrating modern teaching methodologies and computer-aided learning techniques to ensure our students receive the best possible education. The role of a school is not limited to pursuing academic excellence; it also involves motivating and empowering students to become lifelong learners. Our approach addresses the physical, mental, and moral development of each student, meeting their interests, abilities, and aspirations. We aim to equip every child with the skills and techniques necessary to build confidence, nurture their innate talents, instil values, and foster discipline.

We focus on laying a strong foundation for developing the right work habits, attitudes, values, and a positive sense of self-awareness. We encourage our children to become keen observers, curious explorers, and practical users of the knowledge they acquire. At our school, we are a team of dedicated teachers and staff who are deeply committed to the well-being of our students. One common mistake is treating children like blank notebooks waiting to be written upon, disregarding their individuality, unique talents, and special skills. Our system recognizes and respects each child's distinct abilities, helping them develop and enhance the traits they already possess.

Our school is equipped with state-of-the-art Physics, Chemistry, Biology, and Computer labs. Additionally, we are in the process of establishing a Robotics Lab for Artificial Intelligence (AI). We are proud to announce that the Council for the Indian School Certificate Examinations (CISCE) has upgraded our school to include ISC Classes (11th and 12th) for Science and Commerce streams from this session. Beyond academics, our students actively participate in various welfare and social awareness initiatives, such as plantation drives, medical camps, cyber safety programs, and campaigns against animal cruelty, both within and outside the school campus.

We sincerely thank you for your unwavering support, love, and concern for our institution. Your encouragement drives us to continually advance our mission of spreading value-based knowledge to all.

Let us come together to be partners in the holistic development of our children.

**"We cannot always prepare a better future for our children,
but we can always prepare our children for a better future."**

Principal

(Om Prakash Singh)
